When your phone rings and it looks like a local call, you may be more likely to answer. Scammers count on this and can easily fake caller ID numbers. They even can match the first six digits of [your own number](#), which is called “neighbor spoofing.” The urge to answer can be tough to resist, since you might worry it’s a neighbor who needs help, or the school nurse.

If you see a number like this on your caller ID, remember that it could be faked. Letting it go to voicemail is one option. If you do pick up and don’t recognize the caller — hang up.

But what else can you do? [Call blocking services](#) that block or flag unwanted calls can help. These services include mobile apps, features built into your mobile phone, cloud-based services, call-blocking devices, or services provided by your phone service carrier. Some are free and others cost money.

You also can register your number with the [Do Not Call Registry](#). The Do Not Call Registry is designed to stop sales calls from legitimate companies, so it won’t stop calls from scammers. But it could make it easier for you to spot scam calls. If a company is ignoring the Registry, there’s a good chance it’s a scam.

You also can help by [reporting unwanted calls](#). We take the phone numbers you report and release them to the public each business day. This helps phone carriers and other partners that are working on call blocking solutions. Your reports also help law enforcement identify the people behind illegal calls.
